Socialization, training, and owner education is important for every dog, but is even more critical in the development of a German Shepherd Dog. That is why the German Shepherd Dog Club of Minneapolis and St. Paul is offering a Puppy Foundation Class. The class is taught not only by a GSD owner, but one who is also a certified dog trainer and expert in canine and human behavior.

Core components of the class are: socialization, basic manners training, and educating owners on how to properly develop a young GSD into a confident, well adjusted adult.

Each week the dogs are involved in structured socialization and are introduced to new and unique stimuli. All this while the owners are being educated about their pups unique personality and how they can make the most of it. Owners are encouraged to develop a plan for their dogs that not only takes them into adulthood but also into a rewarding and satisfying life. We believe this makes them better companions and canine citizens.

A key benefit to this class is that the owners are surrounded by other GSD owners. This provides a wealth of information from all areas whether you want a companion dog, a show dog, a performance dog, a therapy dog, or anything else one may have in mind for this multi-talented breed.

This is an ideal supplement to a traditional puppy kindergarten class.
